Experience and Expertise

SharePoint Solution for your Business

Windows SharePoint Services is a collection of services that you can use to create team-oriented Web sites to share information and foster collaboration on documents with other users (within an organization and with partners and customers).

SharePoint services offered by Royal Cyber:

- Planning
- Installation, Configuration and Deployment
- Training
- Customization
- Web part creation e.g. web parts for birthday and anniversaries, weather, news, etc

- Powerful search feature that can search *within* documents
- Customizable front end made up of "web parts". Each web part can be moved to different areas of the screen or minimized or closed all together.
- Other web parts include Announcements, Discussion Boards, Links, Calendars, and many more, even MSNBC stock quotes and weather updates!
- creating forms that create/modify SharePoint list records, defaulting in some fields and blocking others, and tasks associated with the ability to set alerts
- Integrate between the client's corporate directory, which is maintained in SharePoint, with Outlook and Active Directory.

SharePoint Support

Our SharePoint experts can help you with whatever your needs are and tell you if SharePoint is right solution for you. Hundreds of companies like Delphi Corp., Compaq, Cable & Wireless, and H&R Block Inc. use SharePoint Portal Server to facilitate information sharing and leverage valuable internal know-how. Contact SharePoint Guru to learn how a SharePoint solution can empower your business
